CIRCLE TIME

THE WEEKLY FOX

Dive into summer!

Last week we wrapped up our ocean theme by learning about the pufferfish, different types of whales and sharks. Our Foxes were amazed to hear a puffer fish's teeth never stop growing and need to eat hard shelled foods to grind them down. We continued working with the ten frame and practiced counting by 10's to 100. This week we will review all our letters and numbers we learned throughout the year, including a few sights words while building and writing short sentences.

CENTERS

Centers included: legos, foam block water table, read with sea animals, beach sand with seashells, and design a fish for our classroom's school of fish.

Projects, projects, projects!

Our Foxes had a lot of practice with fine motor skills last week. We had numerous crafts that required scissors, lacing, coloring, painting, and gluing. We painted a puffer fish, made a whale, constructed a shark using recycled newspaper, and laced shark teeth necklaces.

IMPORTANT DATES:

JUNE 9

*Last day of school
(early dismissal
12pm)*

JUNE 9

*Preschool
graduation
11:30am*

FRIENDLY REMINDERS

To help offset the cost of T-shirts we are asking \$5 for T-shirt donations. Thank you!
